

Global Heating Services

Birmingham – Nottingham – Derby – Sheffield

Safety Policy

Global Heating operates its own safety policy but respectfully reminds customers that they have a duty of care towards all visitors to their site and it is the customer's responsibility to introduce all visitors to their site and warn them of any potential hazards or special safety requirements.

Global Heating Services reserve the right not to work in any area they deem to be to dangerous or work on any equipment that contains any unidentifiable substances.

Global Heating operatives have their own personal safety equipment which is always worn when appropriate and includes:

Safety Shoes
Safety Glasses
Safety Helmet
Ear Plugs

Rubber and Leather gloves
Safety Harness and lanyard
High visibility jackets
Disposable overalls
Dust and particle masks

- j) Work over 12ft from floor will require access plant to carry out works.
- k) Disposal of all arisings from the site is the customer's responsibility.
- l) We reserve the right not to work in any unsafe environment or with any unidentified materials.

Companies Duties

Any company owning or renting a gas fired appliance has a duty under the Gas Safety (Installation & Use) Act 1998 and the Health & Safety at Work Act to ensure that all gas equipment is maintained on an annual basis by a suitable qualified and approved person holding current certification for the areas of work he is going to cover.

It is therefore important that when you have work done on your Gas installation you ensure that the service engineer is suitably qualified by asking to see his CORGI registration card:-

Check the expiry date then check on the back of the card that the engineer is cleared to work on the type of installation you have. If you have commercial or industrial premises anyone working on that system must be cleared for NON-DOMESTIC work.

Make sure you file away all job sheets and reports issued by the service engineer and act responsibly to any recommendations he makes.

Insurance details
